

State Project No. 700-17-0209
F.A.P. No. AC-NH-1710(510)
Increase Capacity of I-10 From
Bridge to I-10/I-12 Split
Route I-10
East Baton Rouge Parish

- Q. In the advertisement under the scope of services, reference is made to a number of previous studies for this corridor. Would it be possible for us to have access and to review any of these studies prior to submittal of our 24-102?
- A. Previous studies are available for viewing in Room 202G of the DOTD Headquarters building. No appointment is necessary.
- Q. Under minimum personnel requirements, h., it states, “a professional or professionals with a minimum of five years experience in public involvement, community outreach, and environmental justice issues.” I’m not sure what environmental justice issues are and what professional is needed for this task. Can you clarify this requirement some?
- A. Environmental Justice refers to the requirements of Presidential Executive Order 12898 concerning impacts on minority and low income populations. Reference the following web site for more information on Environmental Justice: <http://www.fhwa.dot.gov/environment/ej2.htm>. The required professional(s) can be a professional in any field with experience in these areas.
- Q. What is the minimum percentage of work the prime consultant is required to do?
- A. The prime consultant is required to do a minimum of 51% of the work.
- Q. What is meant by the following minimum personnel requirement: “An individual with a minimum of five years experience in producing generated simulations and video presentations with a corresponding support staff”?
- A. Computer Generated Images or CGI make it possible for designers to produce accurate and detailed images of what the completed project will look like. We feel it would be advantageous to use this in the public outreach efforts to let the public see what the finished project will look like. This may ease the fears of those impacted that the project will not destroy the surrounding communities and actually improve aesthetic values. This is an important part of the public outreach effort and demands a high degree of competence.
